

3D PRINTING FOR MARKETING & PROMOTION

EXHIBITIONS & SHOWROOMS

Create scaled models, super-size your product, or highlight key components to help clients visualize your products. 3D printing is a quick and reliable solution to highlight your products at exhibitions, tradeshows, or product launches.

- Scaled Models
- Showrooms
- Product Display Stands
- Props
- Visualizations

Complex Shapes and Designs

Bring any concept to life without the limitations of molding. 3D printing allows for lattices, organic forms, or any creation to be produced.

Combine Digital Manufacturing Technologies

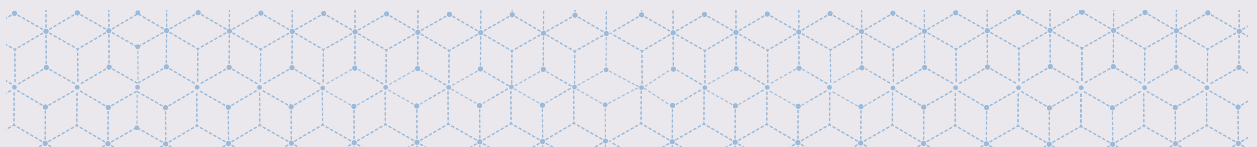

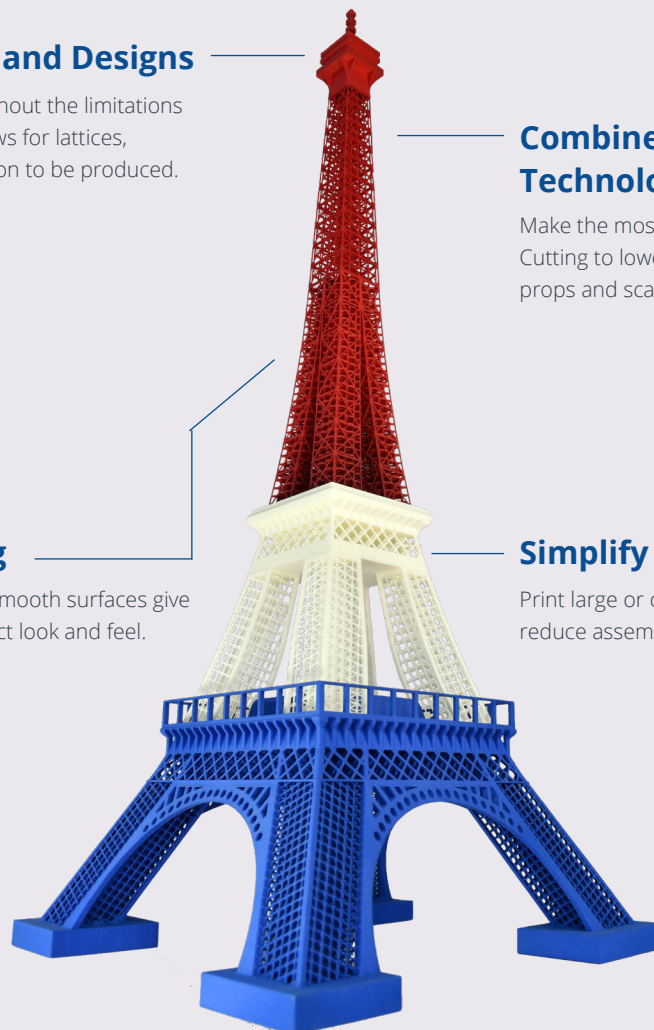

Make the most of both 3D printing and Laser Cutting to lower costs and create one-of-a-kind props and scaled models.

Quality Finishing

High definition colors and smooth surfaces give your show pieces the perfect look and feel.

Simplify Assembly

Print large or complex models in one piece to reduce assembly.

Material Properties:

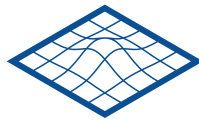

Special Finishes

Gold leaf foil, fabric applications, or metallic coatings give 3D printed props a unique look.

Vibrant Colors

3D printed props can be dyed or painted in any color to match exactly the design concept.

Surface Finish

With professional finishing options, 3D printed models and props have the look and feel of injection molding.

Super-Size

Oversized designs are produced on specialized extra large 3D printers

Durability

Hard plastics such as Nylon PA12 ensure your models and props look great for years to come.

UV Resistance

For window displays, specialized finishing options maintain true colors with exposure to UV rays.

The 3D Printing Advantage:

✔ Unique props to small series production

Whether for a single exhibition or for multiple showrooms, 3D printing is an adaptable solution to produce at scale.

✔ Flexible, on-demand manufacturing

Produce only what you need, when you need it, at speeds CNC machining and foam carving just can't compete with.

✔ Fastest lead-time

Product release dates, tight deadlines, and last-minute changes are no longer an issue.

✔ Cost per part

For unique items and small series, the cost of 3D printing scaled models and props can't be beat.
